EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Foundations of Software Engineering, Software Refactoring

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Operating Systems, Algorithms, Software Engineering, Computer Architecture

WORK EXPERIENCE

NewsBreak **May – August 2026**
Backend Engineer Intern *Mountain View, CA*

- Built the SportsBreak FastAPI / MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI (ruff, pyright, pytest).
- Cut the World feed from 25–30 client requests to one backend call, and fixed a cache that never hit because it was keyed per user (13.2 MB each) by sharing one 10.9 MB copy as the pod neared its memory limit.
- Stood up the service on production EKS (Helm, Jenkins) on day 3, then diagnosed a DNS → TLS → admission-policy chain that blocked iOS clients on public networks and drove a public-domain fix.
- Moved nine third-party integrations server-side so the iOS binary ships zero API credentials, and shipped Stripe checkout for DramaBreak with a signature-verified webhook and idempotent fulfillment.
- Diagnosed a 5-day silent CronJob outage (non-terminal ImagePullBackOff + Forbid concurrency) and fixed it with paired job and scheduler deadlines; set up Prometheus metrics and Grafana dashboards.
- Root-caused a 65% failure rate in another team's Redis Streams LLM workers via Langfuse traces to an unbounded reasoning loop and a Helm env shadowing the code default; sized a token cap to the failing path.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase web app on GCP App Engine; designed database schemas and REST APIs for LangChain resume parsing and AI job matching.
- Led PR reviews, broke down user stories, and mentored interns on Git workflows and testing.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built the LLM mock-interview web app from 0→1 as sole engineer in React, Next.js, and Supabase (PostgreSQL); owned auth, session state, and database interactions.
- Demoed the product to clients and iterated AI scoring with recruiters so its categories matched real-life hiring; three 200–500-person companies signed contracts.

RESEARCH EXPERIENCE

Control & Learning Group — Carnegie Mellon University **February – June 2026**
Graduate Researcher | Advisor: Prof. Yorie Nakahira

- Developed an Online Adaptive Probabilistic Safety Certificate (PSC) with PhD researchers; outperformed Adaptive MPC in 3-DOF vehicle simulations under environmental uncertainty.

SKILLS

Languages	Java, Python, Bash, SQL, C, Go, TypeScript, JavaScript
Databases & Infra	PostgreSQL, MySQL, MongoDB, Redis Streams, Terraform, Linux, AWS, Docker
Backend & Practices	REST APIs, FastAPI, asyncio, Kubernetes, Helm, GitHub Actions, CI/CD, pytest
Frontend	React, Next.js, Supabase, Firebase, HTML, CSS
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **Operating Systems (UW–Madison):** Implemented a pthread-based quicksort in C with mutex-guarded worker counts and condition-variable signaling; contributed xv6 system-call entry points and a clone wrapper.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs, including company-sponsored hackathons and alumni events.
