EDUCATION

Carnegie Mellon University **Expected May 2027**
M.S. in Software Engineering | GPA: 4.0 / 4.0
Selected Coursework: Distributed Systems, Foundations of Software Engineering, Software Refactoring

University of Wisconsin–Madison **May 2024**
B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0
Selected Coursework: Algorithms, Data Structure & Programming III, Operating Systems, Software Engineering

WORK EXPERIENCE

NewsBreak **May – August 2026**
Software Engineering Intern *Mountain View, CA*

- Built the Python FastAPI and MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI (ruff, pyright, pytest).
- Shipped SportsBreak to the App Store as the primary iOS engineer (∼6,000 installs, peak DAU 1,119) with Firebase auth and Sign in with Apple; moved nine integrations server-side so the binary ships zero API keys.
- Built server-driven UI over 27 widget types so a new catalog surface ships without an App Store release, and ActivityKit Live Activities with a widget extension sharing one scoreboard module.
- Stood up production EKS (Helm, Jenkins, Docker) on day 3, set up Prometheus and Grafana, and fixed a 5-day silent CronJob outage with paired job and scheduler deadlines.
- Built a personalized news alert pipeline as a Kubernetes CronJob (ingest, embed, LLM-score, dedupe, push in ∼2 min); ran it in shadow on production traffic for 11 days, cutting filler alerts from 34% to 4%.
- Cut the World feed from 25–30 client requests to one backend call; caught that its cache never hit (keyed per user, 13.2 MB each) and shared one 10.9 MB copy as the pod neared its memory limit.

Haddee Education **June – September 2025**
Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to ship a React, Next.js, FastAPI, and Supabase MVP on GCP App Engine; designed database schemas and REST APIs for LangChain resume parsing and AI job matching.
- Broke down user stories, led PR reviews, reviewed the API structure, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**
Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI from user testing, worked with recruiters so scoring matched real hiring, and demoed the product until three 200–500-person companies signed contracts.

SKILLS

Languages	Python, Java, JavaScript, HTML, CSS, Swift, TypeScript, SQL, Go, C
Cloud & Infra	AWS, GCP, Kubernetes (EKS), Docker, Helm, Jenkins, GitHub Actions, CI/CD, Prometheus, Grafana, Bash, Linux
Web & iOS	React, Next.js, FastAPI, REST APIs, SwiftUI, ActivityKit, Xcode, App Store Connect
Data & Testing	PostgreSQL, MySQL, MongoDB, Supabase, pytest, Unit Testing, Git, Jira, Agile/Scrum
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
- **my-av:** Developed a PyTorch CNN-GRU for real-time steering-angle and speed prediction from 20-frame (1s) video; built a data pipeline over 33 hours of Comma2k19 and trained on GCP Vertex AI.
- **Wisconsin Autonomous:** Integrated wheel-speed encoders with voltage-to-frequency converters on the competition rover and streamed real-time data to the onboard NVIDIA Jetson.
- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
