EDUCATION

Carnegie Mellon University **Expected May 2027**

M.S. in Software Engineering | GPA: 4.0 / 4.0

Selected Coursework: Data Science for Software Engineering, Large Language Model Systems, Foundations of Software Engineering

University of Wisconsin–Madison **May 2024**

B.S. in Computer Science & B.S. in Computer Engineering | GPA: 3.72 / 4.0

Selected Coursework: Algorithms, Data Structure & Programming III, Software Engineering, Large Language Models in Practice

WORK EXPERIENCE

NewsBreak **May – August 2026**

Full-Stack Engineer Intern *Mountain View, CA*

- Shipped SportsBreak to the App Store as the team's sole SwiftUI engineer and primary backend author; the app reached ∼6,000 installs and 1,119 peak daily active users, tracked through a 72-event Amplitude analytics catalog.
- Built the Python FastAPI and MongoDB backend from its first commit to 89 REST endpoints and 7 Kubernetes CronJobs on AWS EKS, with ∼1,450 offline tests gating every merge in CI (ruff, pyright, pytest).
- Built a personalized breaking-news alert pipeline (embeddings, LLM scoring, LLM duplicate check); ran it in shadow mode on production traffic for 11 days before launch, cutting filler alerts from 34% to 4%.
- Shipped a personalized LLM-generated morning digest to 5,026 users (∼81% of the base), with bullets that link back to their sources.
- Built an LLM search API with fixed RAG retrieval on the first question and a capped tool-calling agent on follow-ups; new entity resolution got 20/20 logged queries right that used to return nothing.
- Diagnosed a 5-day silent CronJob outage and fixed it with paired job and scheduler deadlines; set up Prometheus metrics and Grafana dashboards for the backend, and A/B tested DramaBreak menu options by click-through rate in Amplitude.

Haddee Education **June – September 2025**

Engineering Lead *San Diego, CA*

- Led an 8-intern team through Agile sprints to take a React, Next.js, FastAPI, and Supabase web app from 0→1 on GCP App Engine; designed schemas and REST APIs for LangChain resume parsing, suggestions, and AI job matching.
- Broke down user stories, led PR reviews, and mentored interns on Git workflows, testing protocols, and scalable code practices.

ZenAI — MiraclePlus (Formerly YC China) F23 **September – December 2023**

Full Stack Developer *Beijing, China*

- Built a VC-backed startup's LLM mock-interview web app from 0→1 as the sole engineer in React, Next.js, Supabase, and PostgreSQL; owned authentication, session state, and database interactions.
- Iterated AI scoring and UI from user-testing sessions, worked with recruiters so scoring matched real hiring, and demoed the product until three 200–500-person companies signed contracts.

SKILLS

Languages	Python, TypeScript, JavaScript, SQL, HTML, CSS, Java, Go, Swift
Full-Stack	React, Next.js, FastAPI, Pydantic, REST APIs, PostgreSQL, MongoDB, Supabase
AI & LLM	LangChain, RAG, LLM tool calling / agents, Langfuse, Claude Code / AI coding tools
Cloud & Practices	AWS, GCP, Kubernetes (EKS), Docker, CI/CD, Prometheus, Grafana, pytest, Git
Certifications	AWS Certified Solutions Architect – Associate, AWS Certified Cloud Practitioner

PROJECTS & LEADERSHIP

- **codingplans:** Building a site that rates LLM coding plans; bought Z.AI, MiniMax, and Kimi plans and tested KV caching, long context, and needle-in-a-haystack to expose nerfed caching and heavy quantization.
- **ECE Leadership & Engagement Fellow** (CMU, Aug 2026 – present): Own budgeting, marketing, and outreach for ECE student programs — company-sponsored hackathons, alumni events, and tech event outings.
