WORK EXPERIENCE

NewsBreak <i>Full-Stack Engineer Intern</i>	May – August 2026 <i>Mountain View, CA</i>
- Built SportsBreak’s Python/FastAPI and MongoDB backend from the first commit to 89 endpoints on EKS, backed by ~1,450 fully offline tests and CI gates for linting, type checking, and tests; wrote 34 contract-first API specifications. - Shipped Stripe web checkout for DramaBreak with signature-verified webhooks as the sole trusted fulfillment path, idempotent fulfillment, and recovery of pending transactions stale for 60 seconds. - Migrated nine third-party integrations, including SportsDataIO, YouTube Data, and DeepInfra, server-side so the iOS binary ships zero third-party API credentials; consolidated 25–30 catalog requests into one backend call with a 3-second per-source budget. - Sole SwiftUI engineer for SportsBreak, which reached ~6,000 installs and 1,119 peak daily active users; built server-driven UI over 27 widget types so new catalog surfaces ship without an App Store release.	
Haddee Education <i>Engineering Lead</i>	June – September 2025 <i>San Diego, CA</i>
- Led an 8-intern team to build and launch a React, Next.js, FastAPI, and Supabase web app on GCP App Engine; broke down user stories, led PR reviews, and mentored interns on testing and Git workflows. - Designed database schemas and REST APIs for LangChain resume parsing, improvement suggestions, and AI job matching.	
ZenAI — MiraclePlus (Formerly YC China) 2023 Fall Batch <i>Full Stack Developer</i>	September – December 2023 <i>Beijing, China</i>
- Built an LLM mock-interview web app from scratch as the sole engineer using React, Next.js, Supabase, and PostgreSQL; owned authentication, user session state, and database interactions. - Iterated AI scoring and UI from user-testing sessions and recruiter feedback; demoed the product, obtained contracts, and brought mid-sized companies onto the app.
